

Angel Group Co., Ltd.

PRESS RELEASE

February 12, 2025

**Subject: Angel's Smart Table Successfully Implemented
Across All Properties of Sands China In Macao**

Angel Group is proud to announce that at the end of January 2025, Angel Group has successfully completed the implementation of its Smart Table System on all baccarat tables, over 1,100 tables in the mass market areas operated by Sands China Limited, one of the leading Integrated Resort (IR) companies in Macao.

With this latest deployment, approximately 2,000 baccarat tables in Macao, Singapore, the Philippines and Australia are now operating with Angel's Smart Table System.

The operation of Angel Smart Table "Hybrid" Solution utilizes both Artificial Intelligence (AI) and Radio Frequency Identification (RFID) technology to capture each and every chip information including quantity, type, and exact location on the table. This smart table technology revolutionises casino operations on their marketing strategies, game protection, operational efficiency as well as customer experience based on the real-time data analysis, supporting optimal game management.

Angel Group will continue to expand and utilize "Hybrid" solution on its smart tables for the other table games such as Blackjack and dice-based games namely Sic Bo and Roulette.

We remain committed to delivering innovative solutions that enhance the gaming operation for our customers worldwide. Thank you for your continued support.
